

Guard-It-Heat

55 Gallon Drum Heater Drip Guard

GENERAL CONSIDERATIONS

Model DG-55 is a rugged and reliable drip guard to help protect the Wrap-It-Heat line of 55 gallon drum heaters from spillage and eventual heater failure. Model DG-55 drip guard is designed to be used around standard U.S. 55 gallon drums.

Model DG-55 is made of sixteen (16) gauge spun aluminum. There is a one inch wide by three sixteenths inch thick, foam rubber interface between the drum surface and the inside surface of the drip guard. This rubber interface is to provide the drip guard with a tight fit to the drum.

Model DG-55 is designed to fit under one of the drum bell chimes as pictured to the left of this text. The drum heater pictured is Expo's most popular model TRX-55, thermostat controlled drum heater with a three heat switch. The drum heater may also be located upon the bottom section of the drum with the drip guard placed just above it. Please attach Model DG-55 as close to the top of the drum heater as possible in order to provide the maximum protection to the drum heater, however, do not obstruct the view of the pilot lights and controls.

Do not use Model DG-55 around drums that contain flammable material. Never use in hazardous areas. For indoor use only.
